

Overview measurement station at FOH

An impression of the readout screen is shown below:

- If the screen is black, sound levels are within limits.
- If the screen is yellow, sound level is close (1 dB off) to its limits.
- Flashing yellow means temporary excess of level limits.
- **Flashing red means excess of level limits, action must be taken!!!**

Screen background color:

Black: sound levels within limits.

Yellow: sound level is close (1dB off) to its limits.

Flashing yellow: temporary excess of level limits.

Red: Excess of level limits, take action!!!
